TECHNICAL DATA SHEET

# MATERIA 1

Materia 1 is a modern decoration formulated with an aqueous base, where the accurate selection of the raw materials employed leads to a prestigious decorative effect which is, at the same time, very easy to apply.

## **SURFACE PREPARATION**

The wall that is to be decorated must be clean, so remove any impurities and sand it down, if need be. If required, apply a coat of PRIMER AC.

Apply our Materia Base™, colored with our system InTone Color System, in 1 or 2 layers according to the quality of the base (previously diluted at 15%)

## **APPLYING MATERIA 1**

Before proceeding with the decoration, make sure the coat was previously applied to the wall is dry. Use the fit brush, spread the product in alternate stretches on a surface of about 2 m<sup>2</sup>. After about 5 minutes smooth the previously applied product using the brush without paint. Continue this procedure until the work is finished.

## **KEEP THIS PRODUCT OUT OF REACH OF CHILDREN.**

### PRODUCT CHARACTERISTICS

APPROX. COVERAGE: 95-140 ml/ m<sup>2</sup>

DRYING: 2-3 hours to the touch.

Complete polymerization 20 - 25 days

PH: 6.5 – 7.5

SPECIFIC WEIGHT: 1.01 - 1.07

VISCOSITY: 3000 - 8000 cp at 25°C

DILUTION: Product is ready for use

STORAGE AND PROCESSING TEMPERATURE: minimum 7°C, maximum 35°C sensitive to frost

VOC regulation : subcategory L water-based. Maximum VOC limit allowed 200gr/l. Ready to use product VOC content lower than 50 g/l.

APPLICATION TOOLS: Brush

CLEANING THE WALL: with a sponge at least one month after applying Materia 1

TOOL CLEANING: Wash with warm water
